

ADITYA YADAV

Data Scientist

✉ aditya.yadav992636@gmail.com ☎ +91 9926363677 📄 adityadav002 📁 Portfolio 🌐 aditya-yadav003

Aspiring Data Scientist and Full-Stack Developer skilled in Python, SQL, Pandas, NumPy, Scikit-learn, and the MERN stack. Experienced in building end-to-end machine learning pipelines, data-driven applications, and scalable web solutions. Focused on building scalable machine learning and data-driven applications.

SKILLS

Programming Languages (Python | SQL | JavaScript | C++)

Frontend (HTML5 | CSS3 | JavaScript | React | Redux ToolKit)

Backend (Node.js | Express.js | Flask | REST APIs | JWT Authentication | WebSockets)

Data Science & Machine Learning (Pandas | NumPy | Matplotlib | Scikit-learn | Feature Engineering | Data Preprocessing | EDA)

Databases (MongoDB | MySQL)

Developer Tools (Git | GitHub | Visual Studio Code | Antigravity IDE)

PROJECTS

MovieDB — Movie Streaming Platform with ML-Based Recommendation Engine 📄 ,
React.js | Node.js | Express.js | MongoDB | Python | Pandas | Scikit-learn | TMDB API

- Developed a full-stack **movie streaming platform** supporting **4,500+ movies**, secure authentication, genre-based browsing, real-time search, and a responsive MERN-based interface.
- **Engineered** a content-based recommendation system using a dataset of **4,500+ movies**, applying data preprocessing, feature engineering, **CountVectorizer**, and **Cosine Similarity** to generate personalized recommendations.
- **Integrated** an end-to-end machine learning pipeline built with **Python, Pandas, NumPy, and Scikit-learn** into the MERN application through **RESTful APIs**, enabling real-time recommendation delivery.

Creduce — Expense Management & Financial Analytics Platform 📄 ,

Python | Flask | MySQL | Pandas | NumPy | Matplotlib | Scikit-learn | HTML | CSS | JavaScript

- **Constructed** a full-stack expense management platform with secure authentication, **multi-account support**, **10+ default categories**, custom subcategories, interactive dashboards, and category/subcategory tracking for streamlined personal finance management.
- **Designed and optimized** a normalized **MySQL** database with **8+ relational tables** and optimized SQL queries, reducing data redundancy while enabling efficient storage, retrieval, and analysis of financial transaction data.
- **Implemented** a **Scikit-learn** machine learning pipeline using **Python, Pandas, and NumPy** to analyze **5,000+ financial transactions**, integrating predictive analytics into the **Flask** application through **RESTful APIs**.

DataScope — Intelligent CSV Analytics & AutoML Platform,

Python | Flask | Pandas | NumPy | Scikit-learn | Plotly | Matplotlib | Machine Learning

- Developed an end-to-end AutoML platform automating dataset analysis, preprocessing, model recommendation, training, evaluation, and export for **CSV datasets containing thousands of records**.
- Engineered an advanced preprocessing framework that automated feature scaling, categorical encoding, skewness handling, and correlation analysis, accelerating model development cycles by 50%.
- **Automated** the machine learning workflow using **Python, Pandas, NumPy, and Scikit-learn**, recommending suitable algorithms, evaluating model performance, and exporting production-ready models with preprocessing metadata.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

06/2022 – 06/2026 | Indore, India

Bachelor of Technology in Computer Science and Engineering

- **CGPA: 7.69/10** (through 8th Semester).

Higher Secondary Certificate, Adarsh Bouddhik Higher Secondary School, Sukhliya, Indore, Madhya Pradesh, India

2022

Specialized in Mathematics with an overall score of 87.7% in Physics, Chemistry, and Mathematics.

Secondary School Certificate, Adarsh Bouddhik Higher Secondary School, Sukhliya, Indore, Madhya Pradesh, India

2020

- Specialized in Mathematics with an overall score of 93.3% in Physics, Chemistry, and Mathematics.

CERTIFICATIONS & ACHIEVEMENTS

- Earned the NVIDIA Generative AI Certification, gaining hands-on knowledge of LLMs and generative AI concepts.
- Solved 550+ LeetCode problems across data structures and algorithms. 📄
- Achieved the HackerRank Frontend Developer (React) Certification, demonstrating proficiency in React and JavaScript.

ACTIVITIES

Creator & Maintainer – Interview Preparation Repository 📄 , *GitHub*

- **Published 100+ interview preparation resources** covering **SQL, Python, Machine Learning, and Docker**, including coding solutions, detailed explanations, practical examples, and structured technical documentation.
- **Organized** a GitHub repository with categorized learning paths, coding solutions, and interview notes, enabling efficient navigation and self-paced technical preparation.
