

ADITYA YADAV

Data Scientists

✉ aditya.yadav992636@gmail.com 📞 +91 9926363677 🌐 adityadav002 📁 Portfolio 📄 aditya-yadav003

Aspiring Data Scientist with expertise in Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, and Scikit-learn for data analysis, visualization, and machine learning. Skilled in building end-to-end data-driven applications and scalable web solutions using the MERN stack. Passionate about solving real-world problems through data-driven insights, efficient software development, and AI-powered solutions.

SKILLS

Programming Languages (C++ | JavaScript | Python | SQL)

Front-End (HTML5 | CSS3 | JavaScript | React | React Redux ToolKit)

Back-End (Node.js | Express.js | Flask | REST APIs | JWT Authentication | WebSockets)

Tools & Methodologies (Git | GitHub | Visual Studio Code | Antigravity IDE)

Data Science & Machine Learning (Pandas | NumPy | Matplotlib | Scikit-learn | Feature Engineering | Data Preprocessing | EDA)

PROJECTS

MovieDB – AI-Powered Movie Streaming & Recommendation Platform 🌐 ,

React.js | Node.js | Express.js | MongoDB | Python | Pandas | Scikit-learn | TMDb API

- Developed a full-stack movie streaming platform with secure user authentication, dynamic movie search, genre-based browsing, and responsive UI for an improved viewing experience.
- Built a **content-based movie recommendation system** using a dataset of **4,500+ movies**, applying data preprocessing, feature engineering, CountVectorizer, and cosine similarity to generate personalized recommendations.
- Designed an end-to-end machine learning pipeline in **Python** using **Pandas, NumPy, and Scikit-learn**, then integrated the trained model with the MERN application through RESTful APIs.

Creduce – Intelligent Expense Tracking & Financial Analytics Platform 🌐 ,

Python | Flask | MySQL | Pandas | NumPy | Matplotlib | Scikit-learn | HTML | CSS | JavaScript

- Developed a full-stack expense management platform with secure authentication, multi-account support, category and subcategory management, and interactive dashboards for tracking personal finances.
- Designed a scalable **MySQL** database with normalized schemas and optimized SQL queries, enabling efficient storage, retrieval, and analysis of financial transaction data.
- Implemented a machine learning pipeline using **Scikit-learn** to analyze user spending behavior and generate data-driven financial insights, integrating predictive analytics into the Flask application.

DataScope – Intelligent CSV Analytics & AutoML Platform,

Python | Flask | Pandas | NumPy | Scikit-learn | Plotly | Matplotlib | Machine Learning

- Designed and developed an end-to-end **AutoML platform** that automates dataset analysis, advanced data preprocessing, machine learning model recommendation, training, evaluation, and model export from CSV datasets.
- Built a preprocessing engine supporting **missing value imputation, duplicate removal, invalid data correction, outlier detection, feature scaling, categorical encoding, feature engineering, skewness handling, low-variance filtering, and correlation analysis**.
- Automated the machine learning workflow using **Scikit-learn**, recommending suitable algorithms, evaluating model performance, and exporting trained models with preprocessing metadata for production-ready deployment.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, Sushila Devi Bansal College of Technology

06/2022 – 06/2026

- **CGPA: 7.69/10** (Up to 8th Semester).

Higher Secondary Certificate, Adarsh Bouddhik Higher Secondary School, Sukhliya, Indore, Madhya Pradesh, India

2022

Specialized in Mathematics with an overall score of 87.7% in Physics, Chemistry, and Mathematics.

Secondary School Certificate, Adarsh Bouddhik Higher Secondary School, Sukhliya, Indore, Madhya Pradesh, India

2020

- Specialized in Mathematics with an overall score of 93.3% in Physics, Chemistry, and Mathematics.

CERTIFICATIONS & ACHIEVEMENTS

- Earned NVIDIA Generative AI Certification, gaining hands-on knowledge of large language models (LLMs), generative AI concepts.
- Solved 550+ LeetCode problems, strengthening expertise in DSA , problem-solving, and coding interview preparation. 🌐
- Achieved the HackerRank Frontend Developer (React) Certification, demonstrating proficiency in React, JavaScript.

ACTIVITIES

Team Leader – Final Year Major Project, Sushila Devi Bansal College of Technology

- Led a team of **5** members in planning, developing, and delivering the final-year software project.
- Coordinated task allocation, code reviews, Git-based collaboration, and project milestones to ensure timely completion.

Creator & Maintainer – Interview Preparation Repository 🌐 , GitHub

- Authored detailed documentation, explanations, and coding solutions to help students and developers prepare for technical interviews.
- Organized the repository with a scalable structure to encourage open-source collaboration and community contributions.
